

## Description

High performance synthetic gear oils.

## Applications

All type of gears and worm gears working in extreme conditions of temperatures, load and speed.

EPONA SA range brings a high level of working safety in comparison with mineral oils.

## Auxiliary Synthetic Lubricants

## Approvals

EPONA SA range is approved by ALFA LAVAL and WESTPHALIA for the lubrication of the bearings of separators.

## Features and Benefits

+ Very high viscosity index.
+ Low pour point.
+ Excellent anti-wear and extreme pressure properties.
+ Very good resistance to oxidation.
+ Good resistance to hydrolysis.
+ Good anti-rust properties.
+ Good compatibility with seals.
+ Miscible with mineral-based gear oils.

## Typical Characteristics

|  | Methods | Units | 220 | 320 |
| :---: | :---: | :---: | :---: | :---: |

A. Handling, Health \& Safety

Lubricants consisting of synthetic oils with specific additives. In normal conditions of use, these lubricants present no particular toxic hazard. All lubricants, of any kind, should always be handled with great care, particularly avoiding any contact with the skin. Prevent any risk of splashing, and keep away from combustible materials. Store under cover and away from any risk of contamination.
